## BrightVIEW<sup>®</sup> Interactive Loss Information System

# Simple, Flexible Access to Loss Information - 24/7!

# Put BrightView to Work for You!

# Safety and Risk Management Just Got Easier!

SeaBright provides its policyholders access to a wide variety of cutting-edge services to assist them in promoting a safer workplace and more effective risk management for their firms. Our BrightView Interactive Loss Information System gives policyholders and their brokers convenient, user-friendly access to detailed claims information and provides a broad variety of sorting and report configuration options. Plus, BrightView can be accessed anytime via the internet.

- Customer-controlled data security and sharing.
- Claim listing, sorted and limited according to customer-selected criteria.
- Claim details, sorted and limited according to customer-selected criteria.
- Claim analysis, sorted by any combination of seven established criteria.
- Customer summary – an executive-level recap of loss experience for each policy period and all policy periods.
- Standard loss runs – view or print from your computer.
- User-configured custom report templates can be saved and reused as needed.
- Data can be downloaded into MS Excel and other software programs.
- Provided free of charge to in-force policyholders and their brokers via internet.

### For Policyholders:

- Chief Financial Officers
- Risk Managers
- Safety Managers
- Foremen and Other Managers

### For Brokers:

- Producers
- Customer Service Representatives
- Claim Managers
